D3: US 2003/124038 A1

D4: EP-A-0 631 813

2. The subject matter of claim 1 fails to comply with the requirements of PCT Article 33(2):

D1-D4 describe cross-corrugated packing structures comprising first and second surfaces, the first surface having channels into which the second surface is inserted. The two surfaces are independent of each other, the second surface possibly being in the form of a catalyst (see D1-D4: international search report). The applicant's attention is drawn to the fact that these structures can be used, without any modification, in heattransfer and/or mass-transfer installations (see PCT Directives, Chapter 12.05). The subject matter of claim 1 is therefore not novel.
